

# IMMEDIATE WORK OPPORTUNITY

We are a company based in Port Louis which is looking to source 2 or 3 students from the university to function as Junior Software Test Engineers in our QA department until the middle of December 2009.

## **JUNIOR SOFTWARE TEST ENGINEER**

### **Role**

You will be responsible for conducting routine functional testing for various projects, tracking the results of those test cases according to company standards and reporting the results to the QA Manager according to the project timelines.

### **Responsibilities**

- Conduct functional testing (manual)
- Create defect tracking records
- Report the status of software to QA Manager
- Provide accurate and professional timeframes for all work conducted

### **Required Skills**

- Detail oriented and self-motivated
- General knowledge of web technologies (HTML, JavaScript, Flash, HTTP, AJAX)
- General understanding of DBMS (Oracle, MySQL, SQL Server, etc.)
- Creativity and initiative in problem solving
- Technical adeptness, troubleshooting skills
- Excellent English language skills (written and verbal)
- Excellent documentation and communication skills.

### **Remuneration**

- On the job training
- Depending on location, transport to and from work may be provided.
- **Rs10,000** per month
